

West Ada

SCHOOL DISTRICT

February 3, 2017

To Whom It May Concern:

The Technology Staff at the West Ada School District, has had many opportunities to work with Precision Communications. The West Ada Team has relied on the highly qualified and well trained team at Pre-Com from many different types of wiring projects. These projects range from single and multimode fiber installation and termination, Category 5E, 6 and 6A data cabling to computer sound, USB, VGA and HDMI cabling. These installations take place in a myriad of environments, from new construction to retrofits in existing facilities and portable classrooms.

In all cases we have found Pre-Com to be a reliable and trustworthy vendor. Installations are completed both on time and in budget. We can always rely on the staff to help trouble shoot difficult issues and recommend reliable and affordable solutions to the many unique issues found at each of our fifty-four schools.

Fortunately, with Precision's Communication's experience and expertise also comes excellent customer service. The Pre-Com Staff is both knowledgeable, courteous and friendly. We can always rely on them to work in a professional manner with both our technical and non-technical staff. Their years of experience help make them a vendor we can rely on and can recommend for any scale and scope of communications cabling project.

Sincerely,

Devan DeLashmutt
Chief Technology Officer
West Ada Joint District No. 2
