To Whom It May Concern:

It gives me great pleasure to recommend Precision Communications (Pre Com) to your firm. I have worked with Pre Com for the past eight months in Hagerman and Burley, Idaho. In that time, they installed fiber optic communications on a 183 MW combined output wind project, with a total of 11 separate parks and 122 GE 1.5 MW wind turbines. The level of professionalism and knowledge Pre Com brought to the project was outstanding and no doubt a contributing factor to the overall success of the project's budget and schedule.

Working with individuals like Jim Woodhead, and his team of highly skilled technicians, is a delight for any Project Manager. Jim and his team were always willing to take time out of their schedule to answer questions and update their daily progress. Jim continually put forth willingness to take on additional tasks in order to help the progress of the project. Furthermore, the experience Jim has acquired over the years lent itself well to making cost saving decisions which ultimately reduced the budgetary outcome, as well as, the number of "lessons learned" items upon completion.

I recommend Pre Com with enthusiasm, and if given the opportunity, would hire them again for future work.

Sincerely,

A handwritten signature in blue ink, appearing to read "Travis Stutzman", written over a horizontal line.

Travis Stutzman

Project Manager

Idaho Wind Project
