Boise, Idaho 83705

Dear David:

It is truly my pleasure to write this reference letter for you and your staff at Precision Communications. Opening a new facility can be both exciting and a challenge but your staff made our voice and data cabling as well as our phone system installation go flawlessly and we really appreciate all of the efforts made by your team. From your initial design and proposal meetings with us to the installation of the cabling by Justin and Dean, you were one of the few Vendors we could count on to get the job done, and on time. When a couple of our other technology Vendors had issues, you and your team stepped up and helped solve those issues quickly and efficiently.

Being a premier fitness facility, we know the requirement of delivering high quality service to our clients and certainly recognize when other companies provide that type of service for us. We couldn't be more pleased with you and your company and would not hesitate to recommend you to our friends and business associates. We look forward to many years of doing business together!

Sincerely

Derek Agnew
